

# ASSESSMENT OF CHILDHOOD AND ADOLESCENT OBESITY IN ARKANSAS

Year 16 (Fall 2018–Spring 2019)

November 2019

### **Suggested Citation**

ACHI. (2019). *Assessment of Childhood and Adolescent Obesity in Arkansas: Year 16 (Fall 2018–Spring 2019)*. Arkansas Center for Health Improvement. Little Rock, AR.

## Executive Summary

In the United States, more than one-third of children and adolescents are classified as overweight or obese.<sup>1</sup> This population is more likely to be at risk for a variety of health problems, including cardiovascular disease, type 2 diabetes, and bone and joint problems, among others. Children with overweight or obese status who have associated chronic conditions have annual outpatient visit and prescription drug expenditures up to 32.2% and 35.0% higher, respectively, than children who are at a healthy weight.<sup>2</sup> Nationally, it is estimated that obesity-related health care costs the health system \$190 billion per year.<sup>3</sup>

Passed by the Arkansas 84th General Assembly, Act 1220 of 2003<sup>4</sup> spearheaded initiatives to address obesity among school-age children in Arkansas. This landmark legislation called for the creation of the Child Health Advisory Committee (CHAC) to make recommendations to the State Board of Education and the State Board of Health related to nutrition and physical activity in schools. The Act also required improved access to healthier foods and beverages in schools, the creation of local committees to promote physical activity and nutrition, and confidential reporting of each student's weight status to his or her parents or guardians biennially.

The following report details the results of statewide student body mass index (BMI) data collection, including weight classifications and BMI assessment participation rates for the past seven years. The results from the 2017–18 school year show that more than one in five (22.9%) public school-aged children are classified as obese. For students in grade 10, more than one in four (26.0%) are classified as obese.

## Introduction

Act 1220 of 2003<sup>4</sup> established the first state-level legislation in the country to address the alarming prevalence of childhood obesity. The Act is aimed at making changes within schools and school districts to encourage healthier lifestyles for students, school staff, and their families.<sup>5</sup>

Act 201 of 2007<sup>6</sup> amended the original BMI screening requirements of Act 1220 from assessing students in each grade to only assessing students in kindergarten and even-numbered grades 2 through 10. Parents were also offered the option to choose that their child not be screened.<sup>7</sup>

Currently, at least 24 states<sup>a</sup> have passed legislation that requires some form of height and weight health assessment and reporting for public school students.<sup>8</sup>

This report focuses solely on the BMI assessments for all Arkansas public school students, as mandated by Act 1220 and amended by Act 201.

---

<sup>a</sup> Including Arkansas, California, Delaware, Florida, Iowa, Illinois, Kentucky, Louisiana, Massachusetts, Maine, Michigan, Missouri, Nebraska, New Jersey, New York, North Carolina, Ohio, Oklahoma, Pennsylvania, South Carolina, Tennessee, Texas, Wisconsin, and West Virginia.

## BMI Data Collection

The aggregate child BMI assessments presented in this report are an indication of the extent of the problem of childhood and adolescent obesity in Arkansas schools, school districts, and the state.

### PROCESS

To complete the BMI assessments, trained school personnel or student-health professionals obtain one weight and two height measurements for each student. The measurement process is conducted privately with the student facing away from the scale. Data are entered into a secure, web-based computer system that is used to generate individual, confidential child health reports for parents or guardians. All public school students in grades K, 2, 4, 6, 8, and 10 are measured, with a few exceptions (see section titled “Reasons Students’ BMI Could Not Be Assessed” for more information).

### DEFINITION OF BMI

BMI is a constructed value that can be used to assign individuals into underweight, normal or healthy weight, overweight, or obese weight status categories. Using a student’s weight and height measurements, BMI is calculated using the following formula:

$$\text{BMI} = \frac{\text{Weight in pounds}}{(\text{Height in inches})^2} \times 703$$

Boys and girls grow and develop at different rates. Based on the Centers for Disease Control and Prevention (CDC) guidelines, BMI percentiles for students are calculated individually for each boy and girl based upon his or her gender, age, height, and weight.<sup>9</sup>

Following standard classifications based on expert committee recommendations and used by healthcare professionals, BMI percentiles are used to categorize children according to whether they are underweight, healthy weight, overweight, or obese. For children of similar ages and genders, a higher BMI indicates a greater risk for having or developing obesity-related health problems. These BMI-for-age weight status classifications are as follows:

**Obese:** BMI-for-age greater than or equal to 95<sup>th</sup> percentile.

**Overweight:** BMI-for-age greater than or equal to the 85<sup>th</sup> and less than the 95<sup>th</sup> percentile.

**Healthy Weight:** BMI-for-age greater than or equal to the 5<sup>th</sup> and less than the 85<sup>th</sup> percentile.

**Underweight:** BMI-for-age less than the 5<sup>th</sup> percentile.

# Overview of BMI Reports

## CHILD HEALTH REPORTS

Confidential child health reports are made available to parents or guardians regardless of the student's BMI classification. Each report describes the reasons for Arkansas assessing student BMIs, details the BMI screening process, educates parents about obesity-related health risks, and provides simple suggestions to help families improve nutrition and increase physical activity.

There are five types of child health reports, one for each of the four BMI classifications — obese, overweight, healthy weight, and underweight — and one for those students who could not be assessed. If the student was assessed, the report includes the student's height, weight, BMI value, and weight status based on BMI classification. These reports are translated into Spanish for students whose records indicate that Spanish is the primary language spoken at home. Sample child health reports are available on the Arkansas Center for Health Improvement (ACHI) website at [achi.net](http://achi.net).

## SCHOOL REPORTS

BMI profile reports are available to designated school staff through a secure online entry system for each school once BMI data entry has been completed. The reports, which are available on the ACHI website ([achi.net](http://achi.net)), describe the distribution of BMI status among students in each school. BMI classifications for schools are presented separately for male and female students by grade and collectively for all students by gender. BMI classification results for individual public schools in Arkansas are provided in Appendix A of this report. Please note that in order to protect private health information (see the Federal Health Insurance Portability and Accountability Act of 1996), and in compliance with common statistical reporting practices, if fewer than five students are in a BMI classification, then that group is not reported. If fewer than five students are in the overweight or obese groups, they are combined with another group. For example, if fewer than five students are classified as overweight or obese, these two groups are combined and reported as such.

## SCHOOL DISTRICT REPORTS

School district reports combine information from all available school data in that district. Summary statistics for each school and district provide a community assessment of the environmental impact of obesity on public school students. School district reports are also available at [achi.net](http://achi.net). Results for BMI classifications of students in individual Arkansas school districts are presented in Appendix B of this report.

## Student and School Participation in the BMI Data Collection

In the 2018–19 school year, 97.5% (1,011 out of 1,037) of Arkansas public schools, in 252 of 263 school districts, contributed valid measurements in the statewide BMI assessment. Participation rates were similar to those in previous years. Fluctuations in the total number of public schools each year are due to school closings, openings, and consolidations.

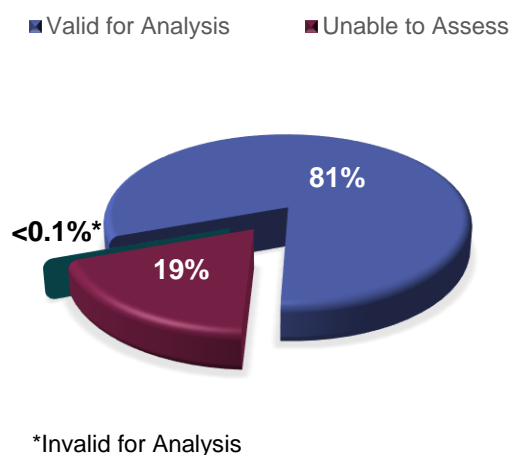

Only schools with students in even-numbered grades were included in this report. The totals include BMI assessments that were submitted by June 30, 2019, for 96.4% (214,179 out of 222,087) of public school students enrolled in grades K, 2, 4, 6, 8, and 10. Among students for whom data was reported, 83.8% (179,512 students) had valid data to allow BMI calculation (see section “Reasons Students’ BMI Could Not Be Assessed”).

Student participation varied by school from 0.84% to 100% of the students enrolled in the required grades. High participation allows for confidence in the results reported by schools and school districts. For those schools or school districts with low participation, under-reporting of select categories is possible.

## Reasons Students’ BMI Could Not Be Assessed

To complete the BMI assessments, schools collected each student’s height and weight measurements. Approximately one in six students (41,049 out of 220,602) was classified as “unable to assess” because the student did not have valid data for height, weight, or both. Table 1 provides a breakdown of reasons for the classification of “unable to assess.” Less than one-tenth of a percent (41 students; see Figure 1) of data submitted was invalid for analysis due to incomplete or incorrect data provided, measurement protocols not being followed, or inaccuracies in the equipment used to complete the assessment.

**FIGURE 1. YEAR 16 STUDENT BMI ASSESSMENT**

**TABLE 1. REASONS UNABLE TO ASSESS BMI**

Breakdown of ‘Unable to Assess’ Reasons		
Child Absent	13,794	(6.4%)
Parent Refused	11,479	(5.4%)
Inaccurate Enrollment Information	3,399	(1.6%)
Child Refused	2,940	(1.4%)
Other	2,413	(1.1%)
Physical Disability	513	(0.2%)
Pregnant	19	(<0.1%)
Weight Exceeded Scale	57	(<0.1%)
Inaccurate Measurements	12	(<0.1%)

## Statewide Results of the Arkansas BMI Assessment

Total public school enrollment in grades K, 2, 4, 6, 8, and 10 for the 2018–19 school year, reported by the Arkansas Department of Education, was 222,087 students enrolled in 1,037 schools within 263 school districts. The results presented in this section are based on data from 214,179 individual students (enrolled in grades K, 2, 4, 6, 8, or 10) with valid BMI assessments reported prior to June 30, 2018, by 1,011 schools in 252 school districts. BMI classifications are reported by gender, race/ethnicity, and grade. This section includes statewide percentages of underweight, healthy weight, overweight, and obese students for selected demographic subgroups. Percentages for these four classifications are also reported for the majority of school districts and counties in the state (see Appendices B and C).

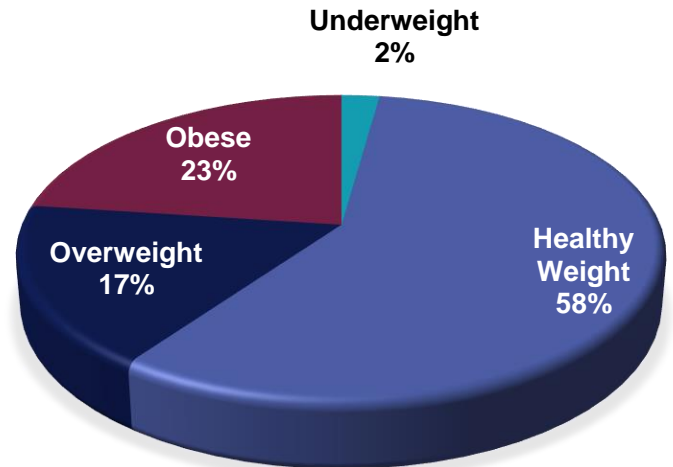

## BMI CLASSIFICATIONS FOR ALL STUDENTS

Figure 2 illustrates the BMI classification distribution of Arkansas students during the 2018–19 school year. In Year 16 (2018–19), 40.0% of Arkansas students were classified as overweight or obese.

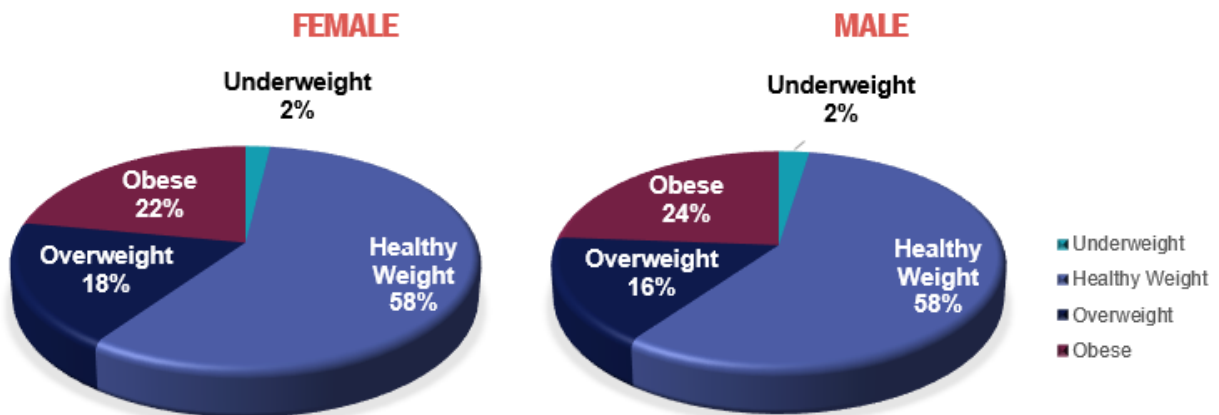

**FIGURE 2. YEAR 16 STUDENT BMI CLASSIFICATION FOR ARKANSAS PUBLIC SCHOOL STUDENTS**

## BMI CLASSIFICATIONS BY GENDER

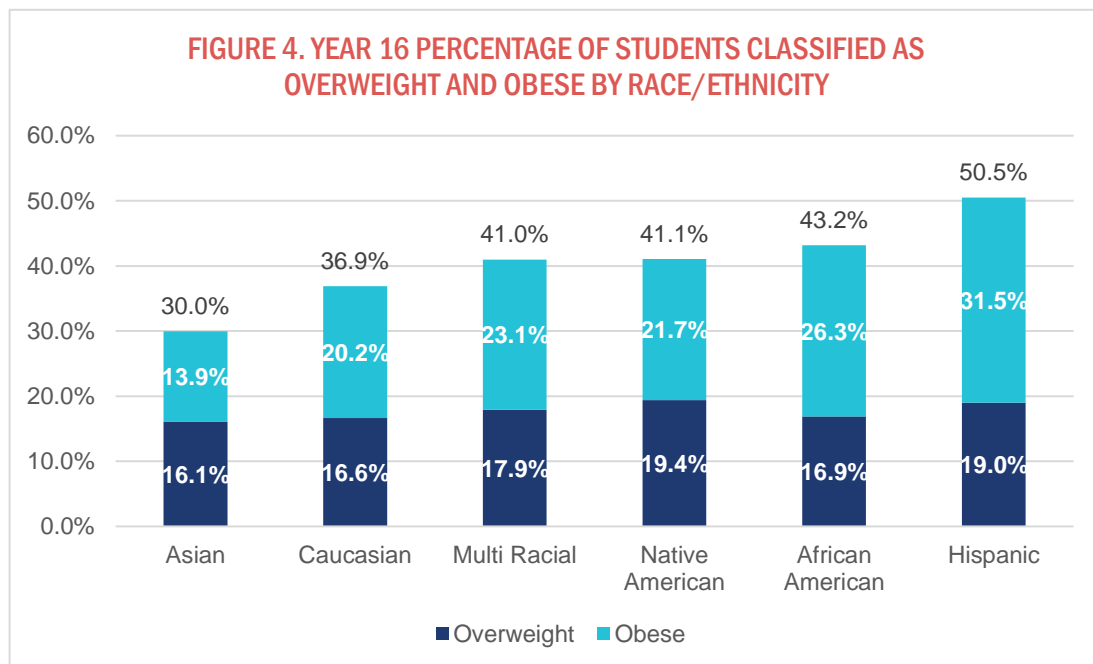

Figure 3 provides BMI classifications by gender for the 2018–19 school year. Slightly more boys (23.8%) than girls (22.1%) were classified as obese. A higher percentage of girls (18.1%) were classified as overweight compared to boys (16.1%). The percentage of healthy weight students was similar for boys and girls (57.6% and 57.9%, respectively).

**FIGURE 3. YEAR 16 STUDENT BMI CLASSIFICATION BY GENDER**

## BMI CLASSIFICATIONS BY RACE/ETHNICITY

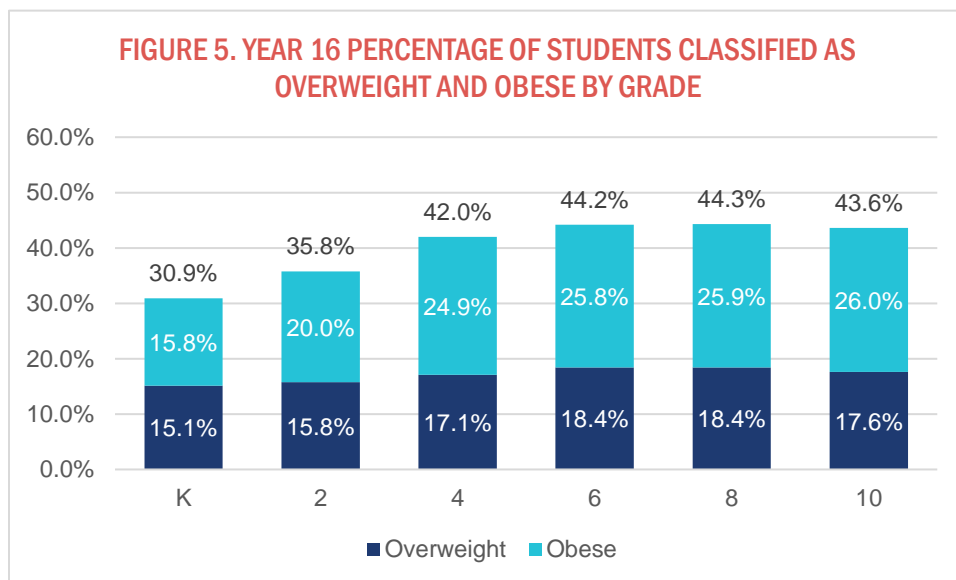

Figure 4 shows the percentage of students classified as overweight and obese by race/ethnicity group. As in prior years, Hispanic students had the highest percentage of students classified as overweight and obese at 50.5%. Among African American students, 43.2% were classified as

either overweight or obese, followed by 41.0% of Multiracial students, 41.1% of Native American students, 36.9% of Caucasian students, and 30.0% of Asian students.

## BMI CLASSIFICATIONS BY GRADE

Figure 5 illustrates the percentage of students who were classified as overweight or obese by grade level. Findings indicate that 30.9% of kindergarten students entered the school system either overweight or obese. The percentage of students classified as overweight or obese increased until grade 6, where it leveled off at approximately 44%, through grade 10.

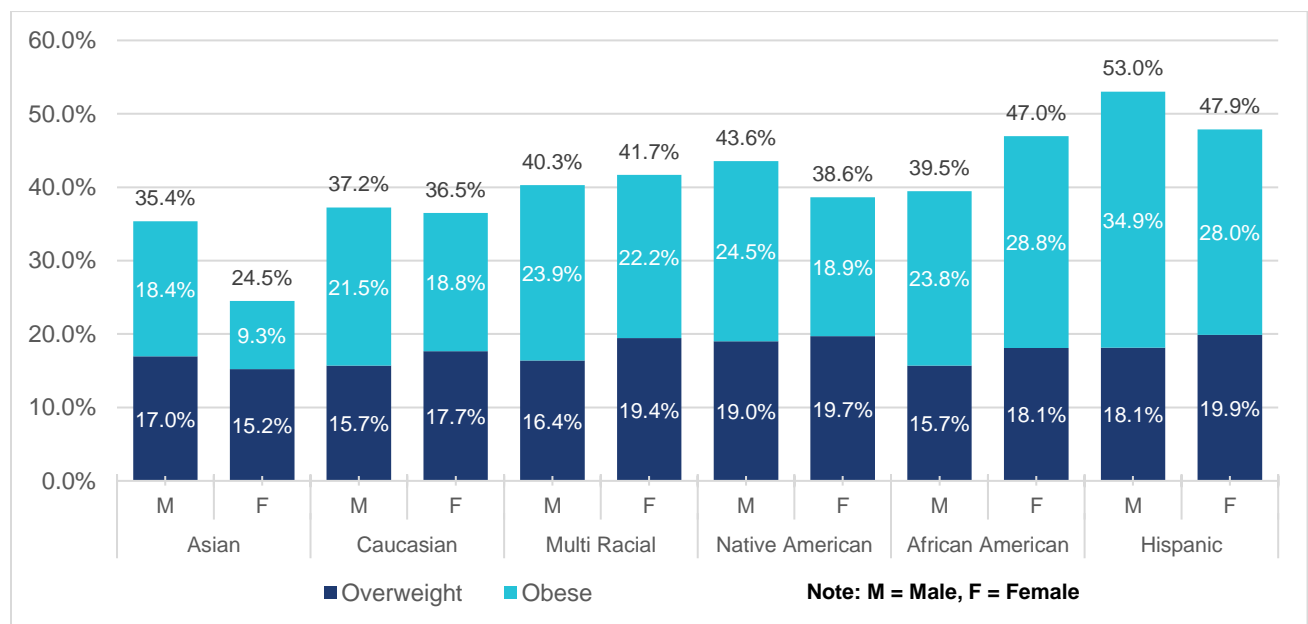

## BMI CLASSIFICATIONS BY RACE/ETHNICITY AND GENDER

When evaluating results by race/ethnicity group and gender, Hispanic boys had the highest percentage of overweight or obesity. In total, more than one-half (53.0%) of Hispanic boys were classified as either overweight or obese (see Figure 6). Asian, Caucasian, and Native American boys also had higher total percentage of overweight or obesity (35.4%, 37.2%, and 43.6%, respectively) compared with girls in the race/ethnicity categories. African Americans were the only race/ethnicity category with a lower percentage of boys (39.5%) who were classified as overweight or obese compared to girls (47.0%). Among female students, the highest percentage of students classified as overweight or obese was found in Hispanics at 47.9%, followed by African Americans at 47.0%.

The greatest difference between male students and female students within a race/ethnicity group was among Asian students, where 24.5% of girls were in the two highest BMI categories compared with 35.4% of boys.

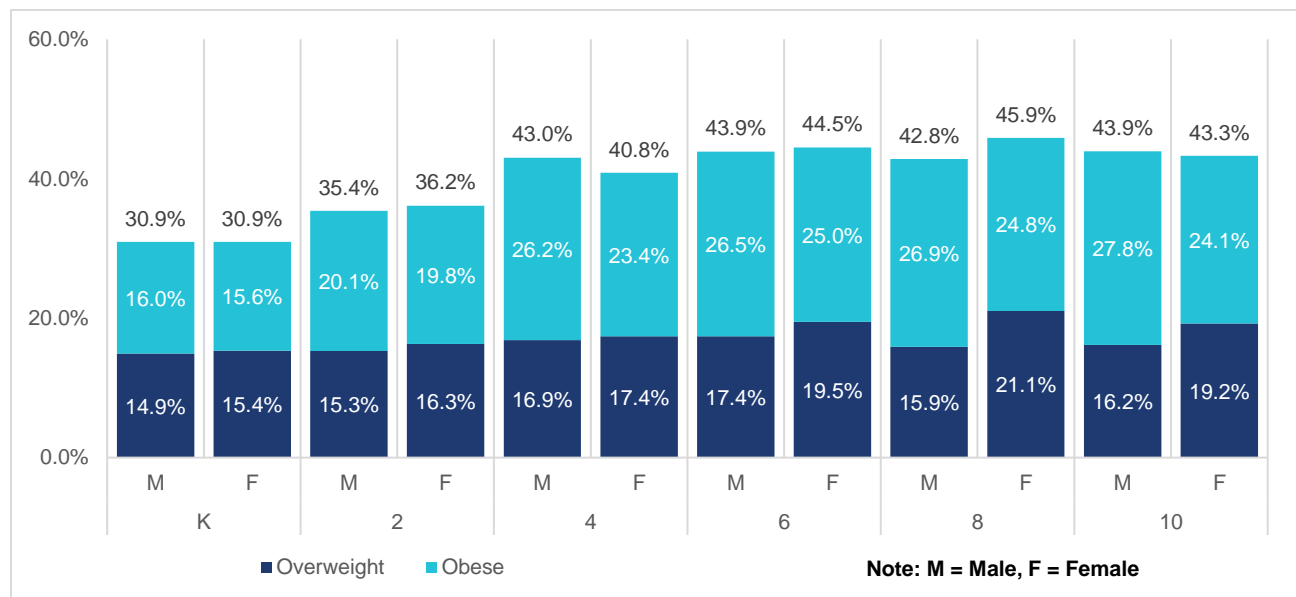

**FIGURE 6. YEAR 16 PERCENTAGE OF STUDENTS CLASSIFIED AS OVERWEIGHT AND OBESE BY RACE/ETHNICITY AND GENDER**

## BMI CLASSIFICATIONS BY GRADE AND GENDER

As illustrated in Figure 7, data show that the same percentage of boys (30.9%) and girls (30.9%) enter school either overweight or obese in kindergarten. In the second grade, the difference continues as a slightly greater percentage of female students (36.2%) than male students (35.4%) were classified in the overweight or obese category. In the fourth grade, the difference between boys and girls was more pronounced than most other grades, with 43.0% of male students and 40.8% of female students in the two highest BMI categories. In the sixth grade, male students and female students were nearly equal (43.9% and 44.5%, respectively) for the total overweight and obese categories. In the eighth grade, the difference between boys and girls was only slightly higher for female students at 45.9% and 42.8% for boys. In the tenth grade the percentage of boys (43.9%) and the percentage of girls (43.3%) was nearly the same in the combined overweight and obese categories.

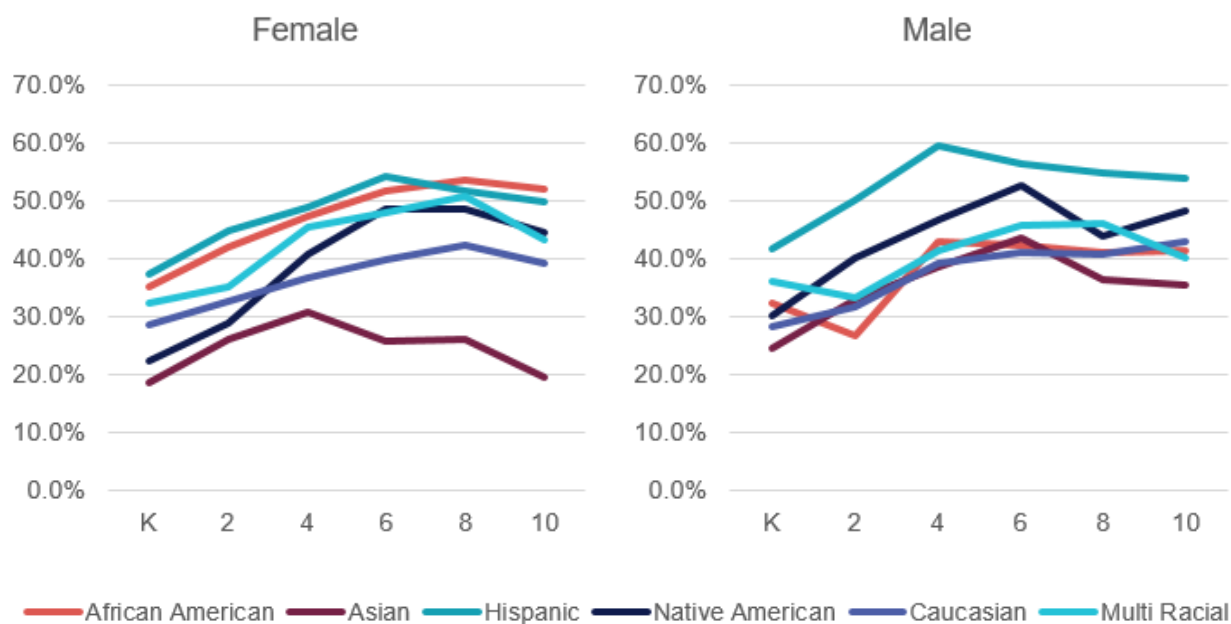

**FIGURE 7. YEAR 16 PERCENTAGE OF STUDENTS CLASSIFIED AS OVERWEIGHT AND OBESE BY GRADE AND GENDER**

## BMI CLASSIFICATIONS BY GENDER, GRADE, AND RACE/ETHNICITY GROUP

Analysis of the BMI data shows that some groups of students face a heightened risk for childhood obesity. The highest percentage of obesity was found among Hispanic boys, especially in the fourth grade, where 59.4% were classified as either overweight or obese (see Figure 8 and Table 2).

**FIGURE 8. YEAR 16 PERCENTAGE OF STUDENT CLASSIFIED AS OVERWEIGHT AND OBESE BY GENDER, RACE/ETHNICITY, AND GRADE**

	Female						Male					
	African American	Asian	Multi Racial	Hispanic	Native American	Caucasian	African American	Asian	Multi Racial	Hispanic	Native American	Caucasian
<b>K</b>	35.1%	18.6%	32.3%	37.3%	22.4%	28.7%	32.4%	24.7%	36.0%	41.7%	30.3%	28.2%
<b>2</b>	42.0%	26.1%	35.2%	44.8%	29.0%	32.7%	26.6%	32.9%	33.3%	50.1%	40.1%	31.8%

## TRENDS IN STUDENT BMI

Data from the past seven years of BMI screenings (see Figure 9) reveal that the distribution of students in each of the four categories (underweight, healthy weight, overweight, and obese) has remained steady.

**FIGURE 9. TRENDS IN BMI CLASSIFICATIONS FOR ARKANSAS PUBLIC SCHOOL STUDENTS**

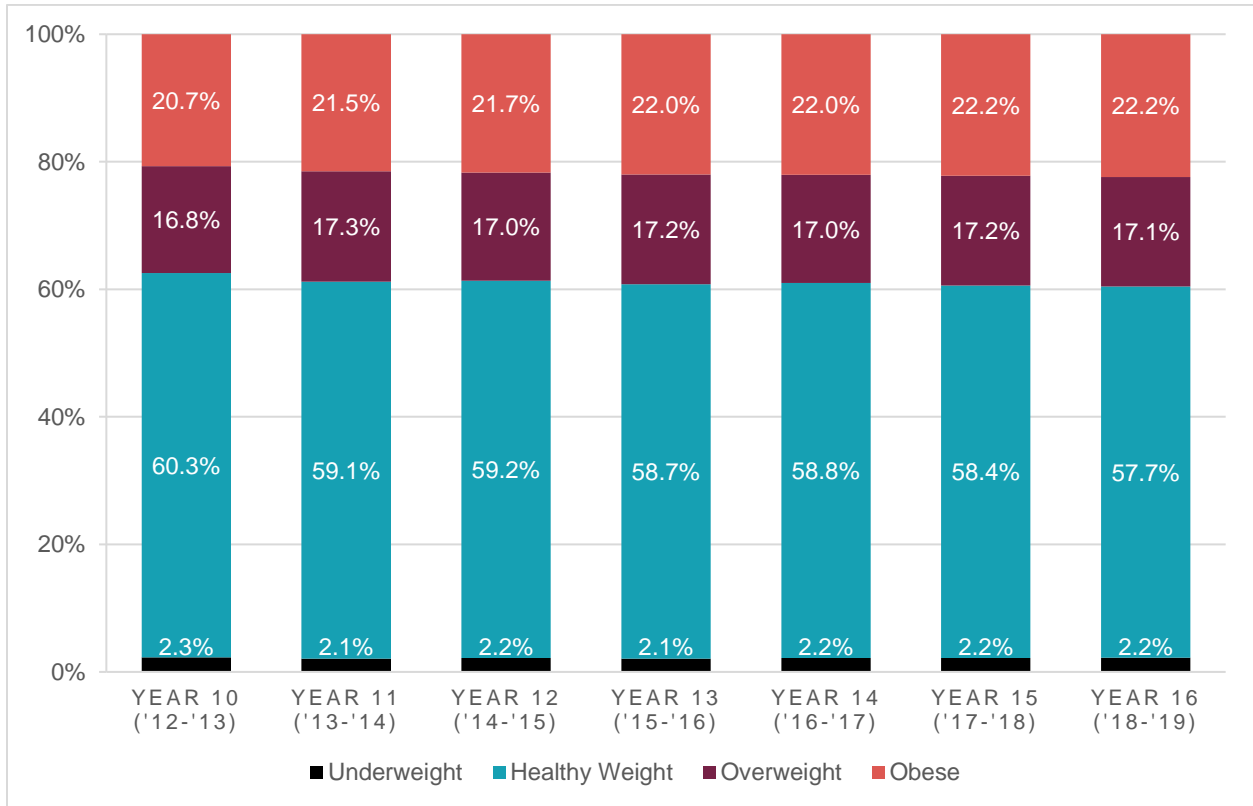

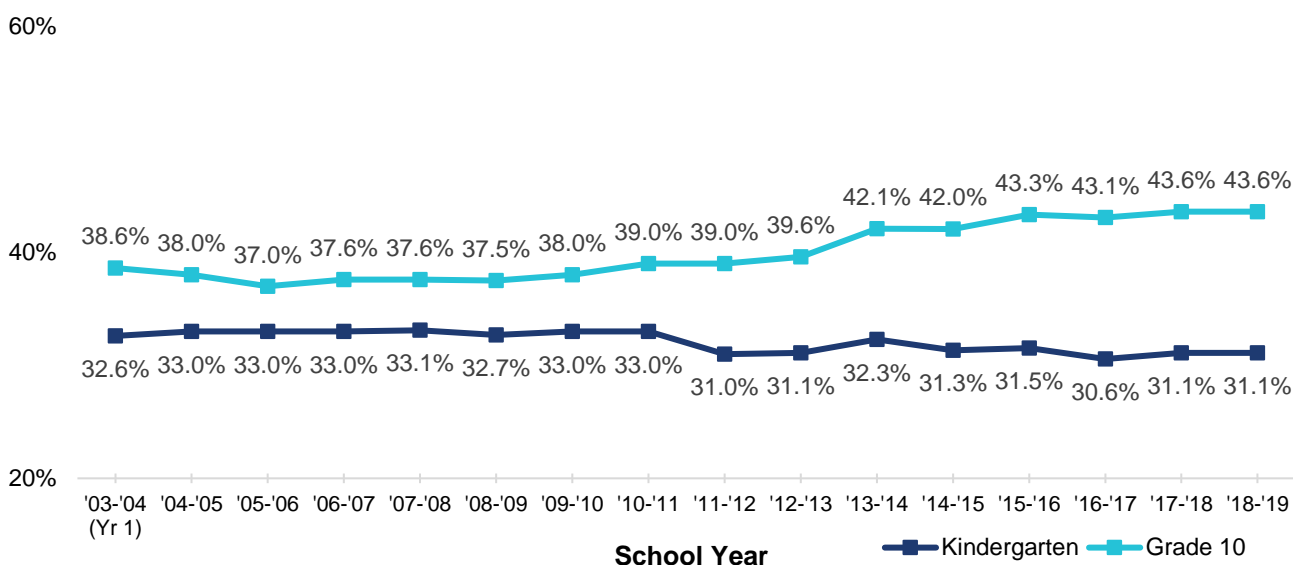

Figure 10 illustrates the trend of students classified as overweight and obese at kindergarten and at grade 10 over the 16 years data has been collected. There has been modest improvement in the percentage of students classified as overweight and obese entering kindergarten from Year 1 (32.6%) to Year 16 (31.1%). However, the percentage of students who are classified as either overweight or obese in grade 10 is at a 16-year high of 43.6%, up five percentage points from the initial grade 10 assessment of 38.6% in Year 1.

**FIGURE 10. PERCENTAGE OF STUDENTS CLASSIFIED AS OVERWEIGHT AND OBESE BY GRADE, YEAR 1 THROUGH YEAR 16**

## Conclusion

The fact that more than 39% of Arkansas public school students are classified as either overweight or obese highlights the need for continued efforts to address child health and wellness. In October 2015, Gov. Asa Hutchinson launched the Healthy Active Arkansas<sup>b</sup> initiative. With partners from the public and private sectors and a statewide network of local champions, Healthy Active Arkansas is a framework of nine priority areas designed to achieve a single, overarching goal: to increase the percentage of adults, adolescents, and children who are at a healthy weight. Priority areas include: physical and built environment; nutritional standards in government, institutions, and the private sector; nutritional standards in schools — early childhood through college; physical education and activity in schools — early childhood through college; healthy worksites; access to healthy foods; sugar-sweetened beverage reduction; breastfeeding; and a marketing program. Each area has two, five, and 10-year strategies with related action steps and partners to help in implementing the plan.

<sup>b</sup> Visit the Healthy Active Arkansas website ([www.healthyactive.org](http://www.healthyactive.org)) for more information.

## Appendix A: BMI Classification by School

Note: In order to protect private health information (see the Federal Health Insurance Portability and Accountability Act of 1996), and in compliance with common statistical reporting practices, if fewer than five students are in a BMI classification, then that group is either not reported or is combined with another group. For example, if fewer than five students are in the underweight category, this category is combined with the healthy weight group. Similarly, for some schools/districts with less than five students classified as overweight or obese, these two groups are combined.

## Appendix B: BMI Classification by School District

Note: In order to protect private health information (see the Federal Health Insurance Portability and Accountability Act of 1996), and in compliance with common statistical reporting practices, if fewer than five students are in a BMI classification, then that group is either not reported or is combined with another group. For example, if fewer than five students are in the underweight category, this category is combined with the healthy weight group. Similarly, for some schools/districts with less than five students classified as overweight or obese, these two groups are combined.

School_District	District LEA	Underweight (%)	HealthyWeight (%)	Underweight and Healthy Weight (%)	Overweight (%)	Obese (%)	Overweight and Obese (%)

## Appendix C: BMI Classification by County

Note: In order to protect private health information (see the Federal Health Insurance Portability and Accountability Act of 1996), and in compliance with common statistical reporting practices, if fewer than five students are in a BMI classification, then that group is either not reported or is combined with another group. For example, if fewer than five students are in the underweight category, this category is combined with the healthy weight group. Similarly, for some schools/districts with less than five students classified as overweight or obese, these two groups are combined.

County	Underweight (%)	Healthy Weight (%)	Overweight (%)	Obese (%)	Overweight and Obese (%)
ARKANSAS	1.74	53.18	17.35	27.72	45.07
