## Executive Summary

In the United States, more than one-third of children and adolescents are overweight or obese.<sup>1</sup> These youth are more likely to be at risk for a variety of health problems such as cardiovascular disease, type 2 diabetes, and bone and joint problems. Overweight or obese children who have associated chronic conditions have annual outpatient visit and prescription drug expenditures up to 32.2 percent and 35.0 percent higher, respectively, than children who are at a healthy weight.<sup>2</sup> Nationally, it is estimated that obesity-related health care costs the health system \$190 billion per year.<sup>3</sup>

Passed by the Arkansas 84<sup>th</sup> General Assembly, Act 1220 of 2003<sup>4</sup> spearheaded initiatives to address obesity among school-age children in Arkansas. This landmark legislation called for the creation of the Child Health Advisory Committee (CHAC) to make recommendations to the State Board of Education and the State Board of Health related to nutrition and physical activity in schools. The Act also required improved access to healthier foods and beverages in schools, the creation of local committees to promote physical activity and nutrition, and confidential reporting of each student's body mass index (BMI) to his or her parents biennially.

The following report details the results of statewide student BMI data collection, including weight classifications and BMI assessment participation rates for the past four years. The results from the 2017–2018 school year show that more than one in five (22.2 percent) public school-aged children are classified as obese. For students in grade 10, more than one in four (25.3 percent) are obese.

## Introduction

Act 1220 of 2003<sup>4</sup> established the first state-level legislation in the country to address the alarming rate of childhood obesity. The act is aimed at making changes within schools and school districts to encourage healthier lifestyles for students, school staff, and their families.<sup>5</sup>

Legislation that was subsequently passed has altered the requirements of Act 1220. In 2007, Act 201<sup>6</sup> altered the BMI screening requirements. Originally, legislation mandated that all Arkansas students be assessed on an annual basis. Under the new requirements, only children in kindergarten and even-numbered grades 2 through 10 are assessed yearly. Furthermore, parents are offered the option to choose that their child not be screened.<sup>7</sup>

This report focuses on the body mass index (BMI) assessments for all Arkansas public school students, as mandated by Act 1220 and amended by Act 201.

Additional legislation was passed that changed requirements for physical activity and physical education.<sup>8</sup> During the Arkansas 2015 regular legislative session, physical education requirements for students in kindergarten through grade 8 were changed again. Act 1079 of 2015 reduced the weekly physical education requirement from 60 minutes to 40 minutes.<sup>9</sup>

Currently, 24 states<sup>a</sup> have passed legislation that requires some form of height and weight health assessment and reporting for public school students.<sup>10</sup> Of the states with general physical activity requirements, Arkansas has one of the lowest minimum requirements for physical activity in the nation.<sup>11</sup>

---

<sup>a</sup> Including AR, CA, DE, FL, IA, IL, KY, LA, MA, ME, MI, MO, NE, NJ, NY, NC, OH, OK, PA, SC, TN, TX, WI, and WV.

## BMI Data Collection

The aggregate child BMI assessments presented in this report are an indication of the extent of the problem of childhood and adolescent obesity in Arkansas schools, school districts, and the state.

### Process

To complete the BMI assessments, trained school personnel or student-health professionals obtain one weight and two height measurements for each student. The measurement process is conducted privately with the student facing away from the scale. Data are entered into a secure, web-based computer system that is used to generate individual, confidential Child Health Reports for parents or guardians. All public school students in grades K, 2, 4, 6, 8, and 10 are measured, with a few exceptions (see section titled “Reasons Students’ BMI Could Not Be Assessed” for more information).

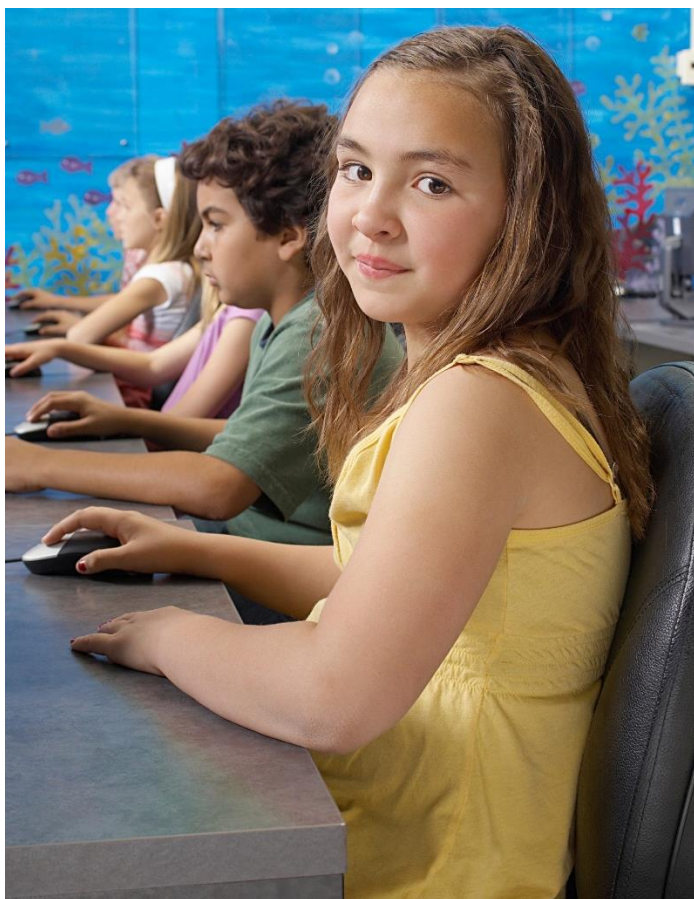

### Definition of BMI

BMI is a measured value used to categorize an individual as underweight, normal or healthy weight, overweight, or obese. It is used as a standard indicator of obesity status based on an individual’s weight-to-height ratio and more accurately measures obesity status than weight alone. Using the student’s weight and height measurements, BMI is calculated using the following formula:

$$\text{BMI} = \frac{\text{Weight in pounds}}{(\text{Height in inches})^2} \times 703$$

Boys and girls grow and develop at different rates. Based upon the Centers for Disease Control and Prevention (CDC) recommendations, BMI percentiles for students are calculated individually for each boy and girl based upon his or her gender, age, height, and weight.<sup>12</sup>

Following standard classifications used by healthcare professionals, BMI percentiles are then used to categorize children according to whether they are obese, overweight, healthy weight, or underweight. A higher BMI indicates a greater risk for having or developing obesity-related health problems.

**Obese:** BMI-for-age greater than or equal to 95<sup>th</sup> percentile.

**Overweight:** BMI-for-age greater than or equal to the 85<sup>th</sup> and less than the 95<sup>th</sup> percentile.

**Healthy Weight:** BMI-for-age greater than or equal to the 5<sup>th</sup> and less than the 85<sup>th</sup> percentile.

**Underweight:** BMI-for-age less than the 5<sup>th</sup> percentile.

## Overview of BMI Reports

### Child Health Reports

Confidential Child Health Reports are made available to parents or guardians regardless of the student's BMI classification. Each report describes the reasons for Arkansas assessing student BMIs, details the BMI screening process, educates parents about obesity-related health risks, and provides simple suggestions to help families improve nutrition and increase physical activity.

There are five types of Child Health Reports, one for each of the four BMI classifications — obese, overweight, healthy weight, and underweight — and one for those students who could not be assessed. If the student was assessed, the report includes the student's height, weight, BMI value, and BMI classification. These reports are translated into Spanish for those students whose records indicate that Spanish is the primary language spoken at home. Sample Child Health Reports are available on the Arkansas Center for Health Improvement (ACHI) website at [www.achi.net](http://www.achi.net).

### School Reports

BMI profile reports are available to designated school staff through a secure online entry system for each school once BMI data entry has been completed. The reports, which are available on the ACHI website ([www.achi.net](http://www.achi.net)), describe the distribution of BMI status among students in each school. BMI classifications for schools are presented separately for male and female students by grade and collectively for all students by gender. BMI classification results for individual public schools in Arkansas are provided in Appendix A of this report. Please note that in order to protect private health information (see the Federal Health Insurance Portability and Accountability Act of 1996), and in compliance with common statistical reporting practices, if fewer than five students are in a BMI classification, then that group is either not reported or is combined with another group. For example, if fewer than five students classified as overweight or obese, these two groups are combined.

### School District Reports

School district reports combine information from all available school data in that district. Summary statistics for each school and district provide a community assessment of the environmental impact of obesity on public school students. School district reports are also available at [www.achi.net](http://www.achi.net). Results for BMI classifications of students in individual Arkansas school districts are presented in Appendix B of this report.

## Student and School Participation in the BMI Data Collection

In the 2017–2018 school year, 98.3 percent (1,029 out of 1,047) of Arkansas public schools, in 256 of 263 school districts, contributed valid measurements in the statewide BMI assessment. Participation rates were similar to those in previous years. Fluctuations in the total number of public schools each year are due to school closings, openings, and consolidations.

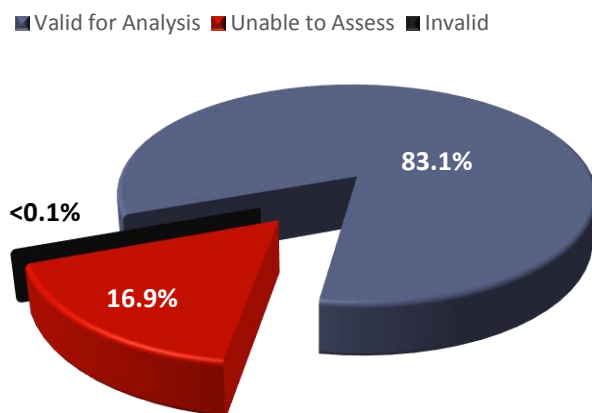

Only schools with students in even-numbered grades were included in this report. The totals include BMI assessments that were submitted by June 30, 2018, for 96.0 percent (216,388 out of 225,440) of public school students enrolled in grades K, 2, 4, 6, 8, and 10. Among students for whom data was reported, 83.1 percent (179,701 students) had valid data to allow BMI calculation (see section “Reasons Students’ BMI Could Not Be Assessed”).

Student participation rates varied by school from 1.0 percent to 100 percent of student enrollment in required grades. High participation rates allow confidence in the results reported by schools and school districts. For those schools or school districts with low participation rates, under-reporting of select categories is possible. Results are reported for 256 of 263 Arkansas school districts.

### Reasons Students’ BMI Could Not Be Assessed

To complete the BMI assessments, schools collected each student’s height and weight measurements. Approximately one in six students (36,654 of 216,388) was classified as “unable to assess” because the student did not have valid data for height, weight, or both. Table 1 provides a breakdown of reasons for the classification of “unable to assess.” Less than one-tenth of a percent (33 students; see Figure 1) of data submitted was invalid for analysis due to incomplete or incorrect data provided, measurement protocols not being followed, or inaccuracies in the equipment used to complete the assessment.

**Figure 1. Year 15 Student BMI Assessment**

**Table 1. Reasons Unable to Assess BMI**

Breakdown of Reasons Unable to Assess	
Absent	14,627 (6.8%)
Parent Refused	12,000 (5.5%)
Student Refused	3,806 (1.8%)
Inaccurate Enrollment Information	3,429 (1.6%)
Other	2,081 (1.0%)
Physical Disability	614 (0.3%)
Pregnant	34 (<0.1%)
Weight Exceeded Scale	51 (<0.1%)
Inaccurate Measurements	12 (<0.1%)

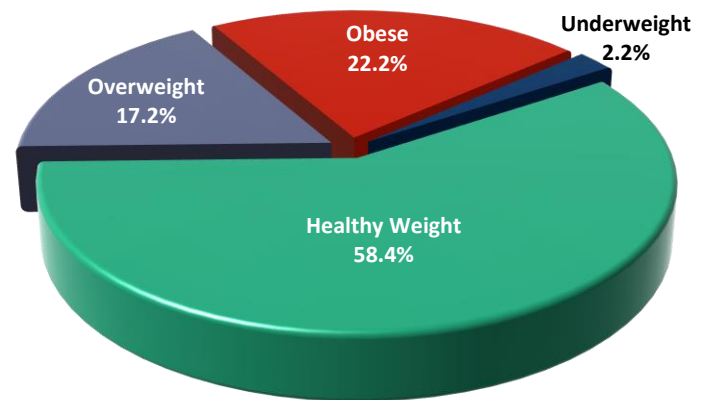

## Statewide Results of the Arkansas BMI Assessment

Total public school enrollment in grades K, 2, 4, 6, 8, and 10 for the 2017–2018 school year, reported by the Arkansas Department of Education, was 225,440 students enrolled in 1,047 schools within 263 school districts. The results presented in this section are based on data from 179,701 individual students (enrolled in grades K, 2, 4, 6, 8, or 10) with valid BMI assessments reported prior to June 30, 2018, by 1,029 schools in 256 school districts. BMI classifications are reported by gender, race/ethnicity, and grade. This section includes statewide percentages of underweight, healthy weight, overweight, and obese students for selected demographic subgroups. Percentages for these four classifications are also reported for the majority of districts and counties in the state (see Appendices B and C).

### BMI Classifications for All Students

Figure 2 illustrates the BMI classification distribution of Arkansas students during the 2017–2018 school year. In Year 15 (2017–2018), 39.4 percent of Arkansas students were classified as overweight or obese.

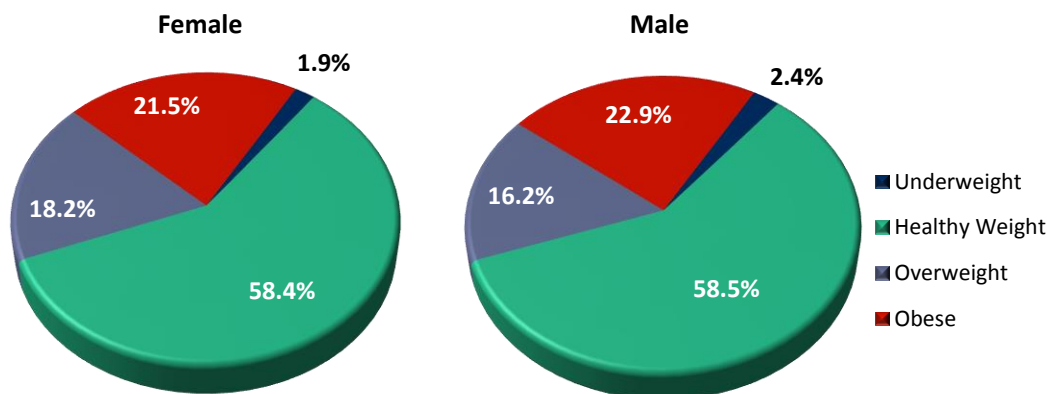

**Figure 2. Year 15 Student BMI Classification for Arkansas Public School Students**

### BMI Classifications by Gender

Figure 3 provides BMI classifications by gender for the 2017–2018 school year. Slightly more boys (22.9 percent) than girls (21.5 percent) were classified as obese. In the overweight category, a higher percentage of girls (18.2 percent) were classified than boys (16.2 percent). The percentage of healthy weight students was similar for boys and girls (58.4 percent and 58.5 percent, respectively).

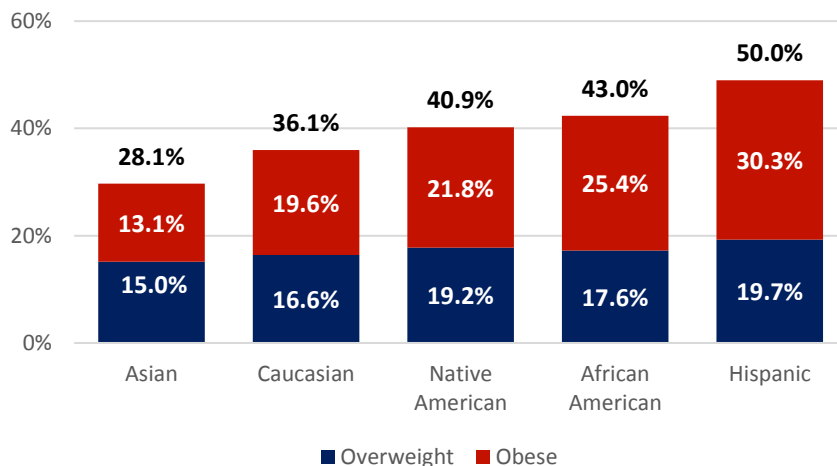

**Figure 3. Year 15 Student BMI Classification by Gender**

## BMI Classifications by Race/Ethnicity

Figure 4 shows the percentage of students classified as overweight and obese by race/ethnicity group. As in prior years, Hispanic students had the highest rates of overweight and obese students at 50.0 percent. Among African American students, 43.0 percent were either overweight or obese, followed by 40.9 percent of Native American students, 36.1 percent of Caucasian students, and 28.1 percent of Asian students.

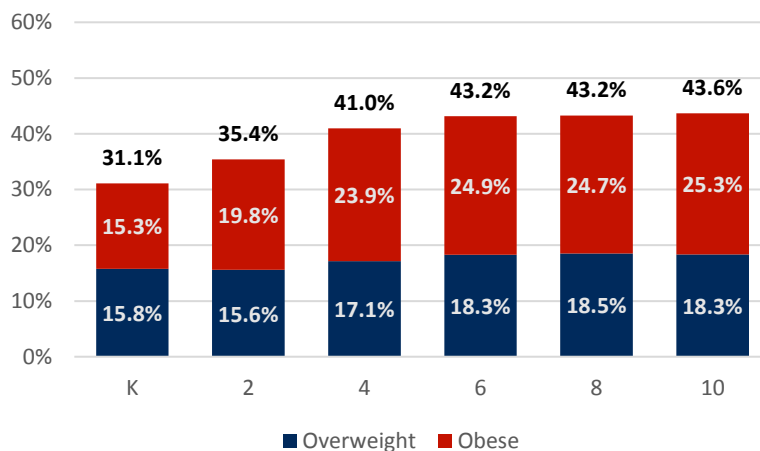

**Figure 4. Year 15 Percentage of Students Overweight & Obese by Race/Ethnicity**

## BMI Classifications by Grade

Figure 5 illustrates the percentage of students who were overweight or obese by grade level. Findings indicate that 31.1 percent of kindergarten students entered the school system either overweight or obese. The percentage of students who are either overweight or obese increases until grade 6, where it levels off at just over 43 percent of students through grade 10.

**Figure 5. Year 15 Percentage of Students Overweight & Obese by Grade**

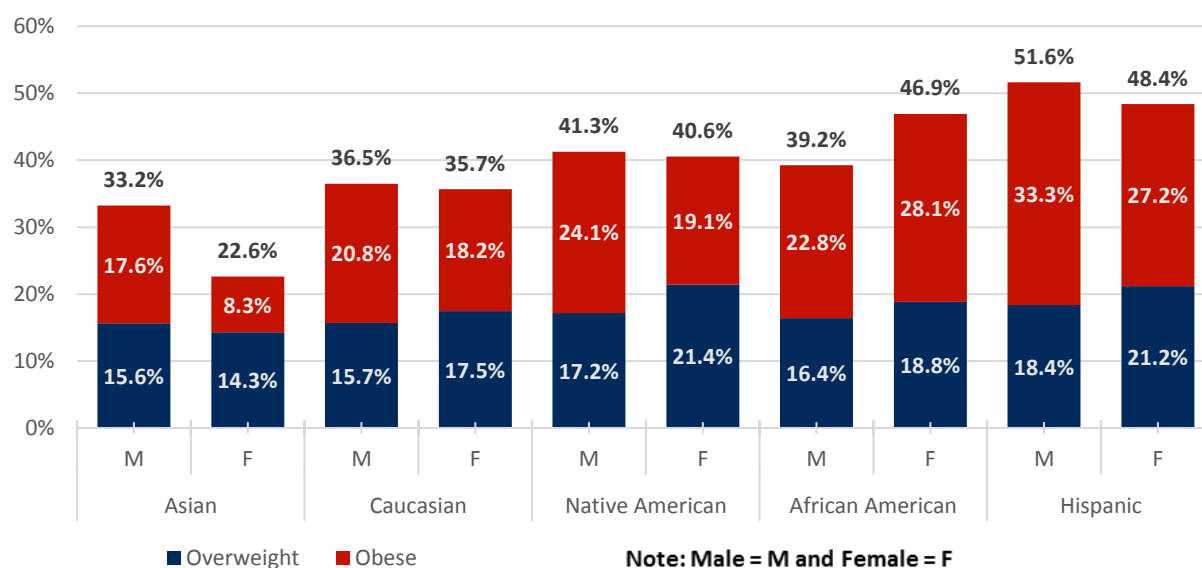

## BMI Classifications by Race/Ethnicity and Gender

When evaluating results by race/ethnicity group and gender, Hispanic boys showed the highest percentage of overweight or obese students, with more than half (51.6 percent) of Hispanic boys classified as either overweight or obese (see Figure 6). Asian, Caucasian, and Native American boys also had higher rates (33.2 percent, 36.5 percent, and 41.3 percent, respectively) compared with girls in the same groups. African Americans were the only group with a lower percentage of boys (39.2 percent) that were overweight or obese compared with girls (46.9 percent). Among female students, the highest percentage of overweight or obese students was found in Hispanics at 48.4 percent, followed by African Americans at 46.9 percent. Native American girls had a combined overweight and obesity rate of 40.6 percent, while 35.7 percent of Caucasian girls and 22.6 percent of Asian girls were classified as overweight or obese.

The greatest difference between male students and female students within a race/ethnicity group was among Asian students, where 22.6 percent of girls were in the two highest BMI categories compared with 33.2 percent of boys.

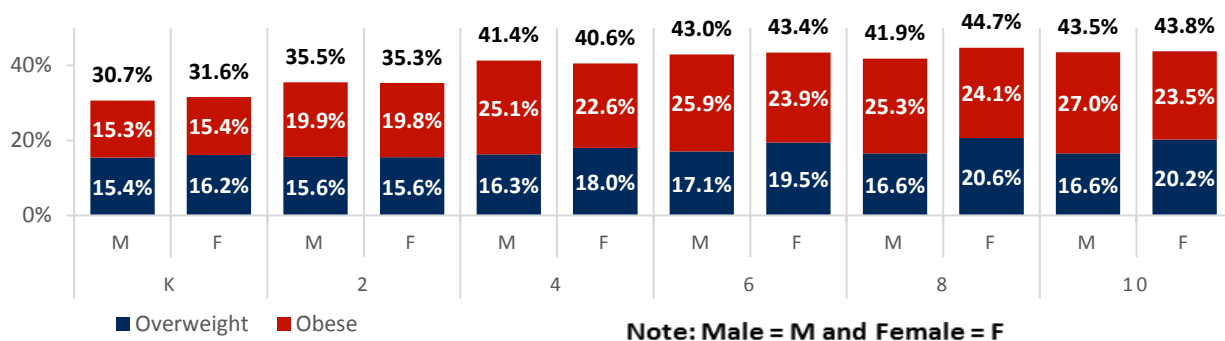

**Figure 6. Year 15 Percentage of Students Overweight & Obese by Race/Ethnicity & Gender**

### BMI Classifications by Grade and Gender

As illustrated in Figure 7, data show that about the same percentage of boys (30.7 percent) and girls (31.6 percent) enter school either overweight or obese in kindergarten. In the second grade, the trend continues as a slightly greater percentage of male students (35.5 percent) than female students (35.3 percent) were classified in the overweight or obese category. When looking at both overweight and obese students in the fourth grade, there was a slightly greater percentage of boys (41.4 percent) than girls (40.6 percent). In the sixth grade, male students and female students were about equal (43.0 percent and 43.4 percent, respectively) for the total overweight and obese categories. In the eighth grade, the difference between boys and girls was more pronounced than most other grades, with 41.9 percent of male students and 44.7 percent of female students in the two highest BMI categories. In the tenth grade the percentage of boys (43.5 percent) and the percentage of girls (43.8 percent) was nearly the same in the combined overweight and obese categories.

**Figure 7. Year 15 Percentage of Students Overweight & Obese by Grade & Gender**

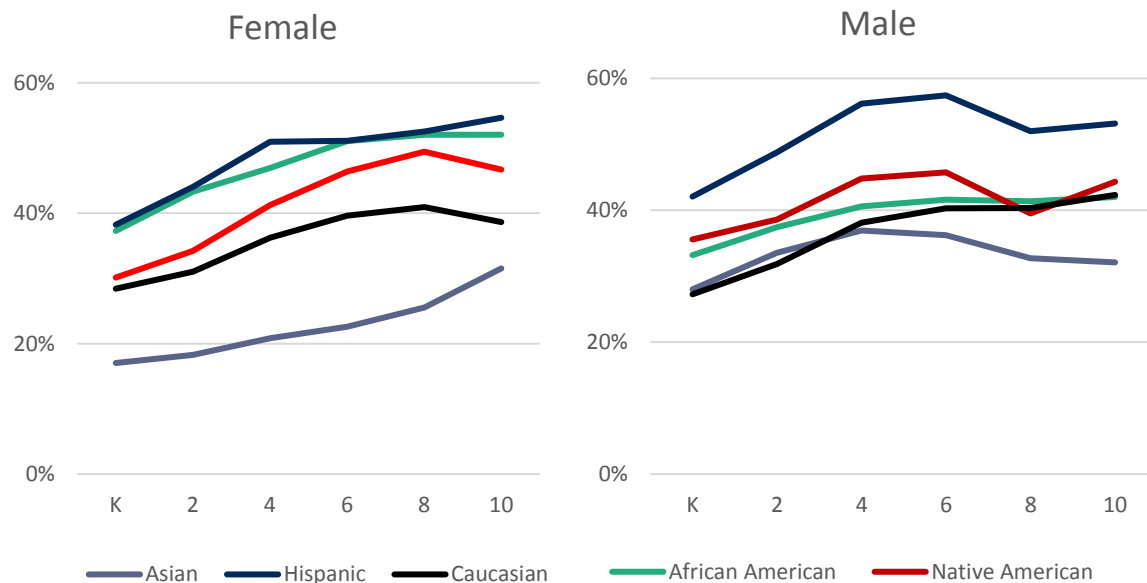

## BMI Classifications by Gender, Race/Ethnicity Group, and Grade

Analysis of the BMI data shows that some groups of students face a heightened risk for childhood obesity. The highest obesity rates were found among Hispanic boys, especially in the sixth grade, where 57.4 percent were classified as either overweight or obese (see Figure 8 and Table 2).

**Figure 8. Year 15 Percentage of Students Overweight & Obese by Gender, Race/Ethnicity, & Grade**

**Table 2. Year 15 Percentage of Students Overweight & Obese by Gender, Race/Ethnicity & Grade**

	Female					Male				
	African American	Asian	Hispanic	Native American	Caucasian	African American	Asian	Hispanic	Native American	Caucasian
K	37.3%	17.0%	38.2%	30.1%	28.4%	33.2%	28.0%	42.1%	35.6%	27.3%
2	43.3%	18.3%	44.0%	34.2%	31.1%	37.5%	33.6%	48.8%	38.6%	31.9%
4	46.9%	20.8%	50.9%	41.2%	36.2%	40.6%	36.9%	56.2%	44.8%	38.1%
6	51.0%	22.6%	51.1%	46.4%	39.6%	41.6%	36.2%	57.4%	45.7%	40.3%
8	52.0%	25.5%	52.5%	49.4%	40.9%	41.4%	32.7%	52.0%	39.5%	40.3%
10	52.0%	31.5%	54.6%	46.7%	38.7%	42.0%	32.1%	53.1%	44.3%	42.3%

## Trends in Student BMI

Data from the past six years of BMI screenings (see Figure 9) reveal that the distribution of students in each of the four categories (underweight, healthy weight, overweight, and obese) has remained steady.

**Figure 9. Trends in BMI Classifications for Arkansas Public School Students**

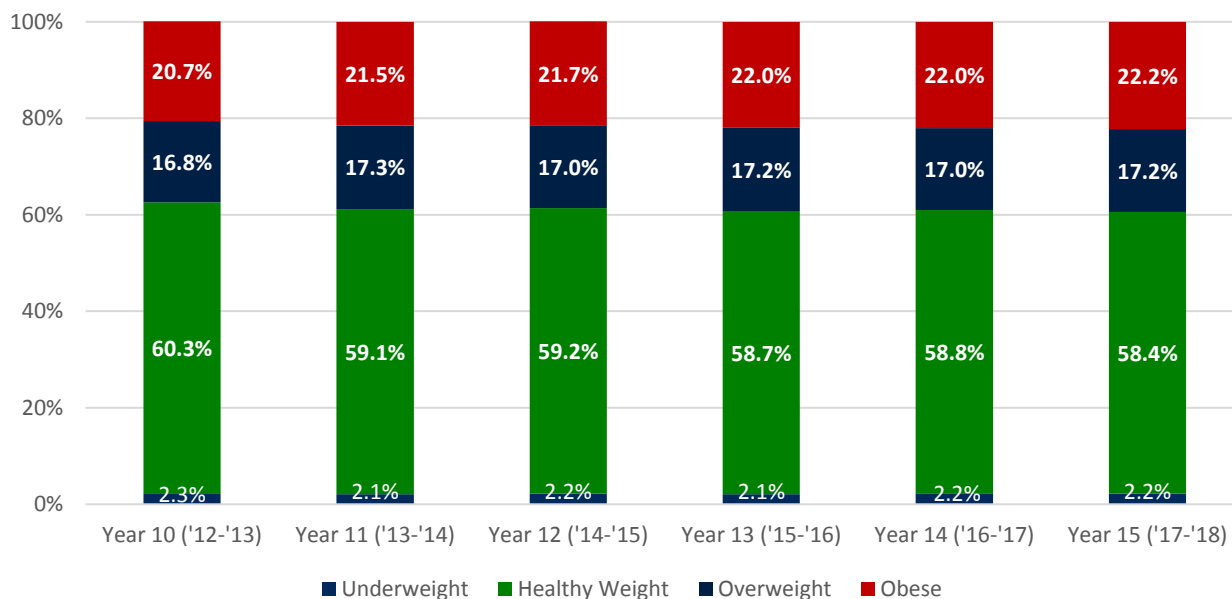

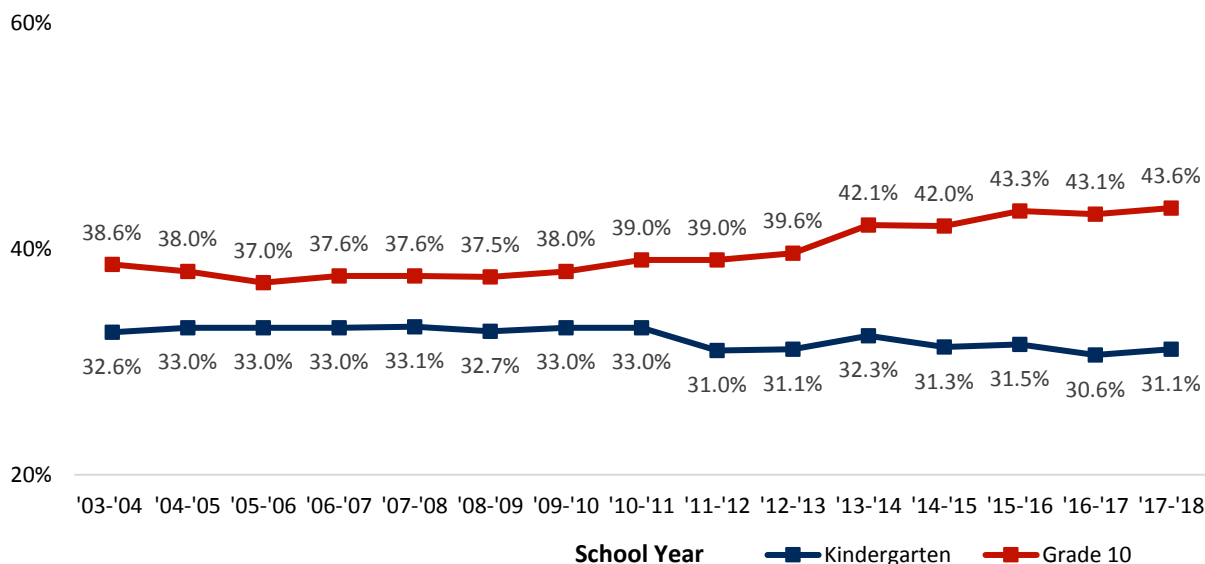

Figure 10 illustrates the trend of overweight and obese students at kindergarten and at grade 10 over the 15 years data has been collected. There has been modest improvement in the percentage of overweight and obese students entering kindergarten from Year 1 (32.6 percent) to Year 15 (31.1 percent). However, the percentage of students who are either overweight or obese in grade 10 is at a 15-year high of 43.6 percent, up 5.0 percentage points from the initial grade 10 assessment of 38.6 percent in Year 1.

**Figure 10. Percent of Students Overweight & Obese by Grade, Year 1 to Year 15**

## Conclusion

The fact that more than 39 percent of Arkansas public school students are classified as either overweight or obese highlights the need for continued efforts to address child health and wellness. In October 2015, Gov. Asa Hutchinson launched the Healthy Active Arkansas<sup>b</sup> initiative. With partners from the public and private sectors and a statewide network of local champions, Healthy Active Arkansas is a framework of nine priority areas designed to achieve a single, overarching goal: to increase the percentage of adults, adolescents, and children who are at a healthy weight. Priority areas include: physical and built environment; nutritional standards in government, institutions, and the private sector; nutritional standards in schools — early childhood through college; physical education and activity in schools — early childhood through college; healthy worksites; access to healthy foods; sugar-sweetened beverage reduction; breastfeeding; and a marketing program. Each area has two, five, and 10-year strategies with related action steps and partners to help in implementing the plan.

## Appendix A: BMI Classification by School

Note: In order to protect private health information (see the Federal Health Insurance Portability and Accountability Act of 1996), and in compliance with common statistical reporting practices, if fewer than five students are in a BMI classification, then that group is either not reported or is combined with another group. For example, if fewer than five students are in the underweight category, this category is combined with the healthy weight group. Similarly, for some schools/districts with less than five students classified as overweight or obese, these two groups are combined.

## Appendix B: BMI Classification by School District

Note: In order to protect private health information (see the Federal Health Insurance Portability and Accountability Act of 1996), and in compliance with common statistical reporting practices, if fewer than five students are in a BMI classification, then that group is either not reported or is combined with another group. For example, if fewer than five students are in the underweight category, this category is combined with the healthy weight group. Similarly, for some schools/districts with less than five students classified as overweight or obese, these two groups are combined.

School District	District LEA	Underweight (%)	Healthy Weight (%)	Underweight and Healthy Weight (%)	Overweight (%)	Obese (%)	Overweight and Obese (%)
ACADEMICS PLUS SCHOOL DISTRICT	6040700	2.0	63.2	65.2	18.4	16.4	34.9

## Appendix C: BMI Classification by County

Note: In order to protect private health information (see the Federal Health Insurance Portability and Accountability Act of 1996), and in compliance with common statistical reporting practices, if fewer than five students are in a BMI classification, then that group is either not reported or is combined with another group. For example, if fewer than five students are in the underweight category, this category is combined with the healthy weight group. Similarly, for some schools/districts with less than five students classified as overweight or obese, these two groups are combined.

County	Underweight (%)	Healthy Weight (%)	Overweight (%)	Obese (%)	Overweight and Obese (%)
ARKANSAS	1.51	54.87	17.53	26.09	43.62
ASHLEY	1.75	56.98	17.07	24.2	41.27
